

Sehaj Kohli

s.kohli@queensu.ca | (506)-953-2068 | GitHub: Aris2159 | linkedin.com/in/sehaj-kohli | sehajkohli.com

Computer Science student at Queen's University with hands-on experience building full-stack applications and participating in competitive hackathons. Eager to apply skills in Python, JavaScript, and React to real-world software problems. Quick learner with strong communication skills and a track record of contributing in team-based environments.

EDUCATION

Bachelor of Computing (Honours) — Queen's University — Kingston, ON

Returning: Fall 2026

- D & R Sobey Atlantic Award

TECHNICAL & PROFESSIONAL SKILLS

Languages: Python, C#, JavaScript, HTML, CSS

Frameworks & Tools: React, Git, Microsoft Excel, Word, PowerPoint

Concepts: Computational thinking, algorithm design, full-stack development, text classification

Soft Skills: Strong verbal & written communication, teamwork, attention to detail, adaptable, quick learner

PROJECTS

AI Content Detection Tool — HackHer 2026 — 24-Hour Hackathon

2026

- Built a rule-based text classification tool from scratch under 24-hour time constraints
- Developed a weighted keyword-scoring algorithm to detect AI-generated linguistic patterns
- Integrated a React frontend with a Python backend to enable real-time text analysis
- Designed threshold-based classification logic and iterated on performance through testing

Custom Interpreted Programming Language — In Progress

2026–Present

- Designing and building an interpreted programming language from scratch using TypeScript
- Implemented a custom lexer, parser, and abstract syntax tree (AST) to handle tokenization and syntax evaluation
- Developed core language features including conditionals, loops, functions, and variable declarations

Personal Portfolio Website — sehajkohli.com

2026

- Designed and developed a personal portfolio site using HTML, CSS, and JavaScript

WORK EXPERIENCE

Machine Operator (Summer Student) — Michelin

2026

- Operated finishing-line machinery and performed quality inspections to ensure product standards
- Monitored equipment for alarms, resolved minor faults independently, and escalated to maintenance when needed
- Maintained clear communication with supervisors to minimize production downtime

Deli/HMR Clerk (Part-Time) — Atlantic Superstore

2023–2025

- Served 50+ customers daily in a fast-paced environment while maintaining quality and safety standards
- Managed competing priorities during peak hours and collaborated with team to meet departmental goals

LEADERSHIP & INVOLVEMENT

Industry Outreach & Social Events Coordinator — COMPSA — Queen's University

2025–2026

- Engage alumni and industry professionals to build career partnerships and coordinate virtual networking events for computing students

Research Assistant — PhD Project (Volunteer) — Queen's University

2026–Present

- Review and summarize academic literature on AI mental health apps and chatbots, assessing relevance and quality of studies

President, Cybersecurity Team — Saint John High School

2023–2025

- Led team through CyberPatriot competitions, mentoring members in technical skills and organizing practice sessions to foster collaboration

VOLUNTEER WORK

- Children's Wish Foundation (2021–2024) | Atlantic Khalsa Darbar (2022–2025)
