SEHAJNOOR KOHLI

506-953-2068 Aris2159 Sehaj-Kohli s.kohli@queensu.ca sehajkohli.com

EDUCATION

Queen's University - Kingston, ON Expected May 2029

Bachelor of Computing (Honours), Software Design, GPA: 4.04/4.30
Award: Sobeys Atlantic Award - Recognized for scholarship, leadership, and outstanding community involvement

Relevant Coursework: Data Structures, System-Level Programming, Software Specifications, Computer Architecture, Programming Paradigms, Logic for Computing Science, Discrete Structures II, Fundamentals of AI

SKILLS

Languages: Assembly, C, C++, Python, Java, JavaScript, TypeScript, HTML/CSS, VBA
Frameworks & Libraries: FastAPI, React, Gradio, BeautifulSoup, Pydantic, PyTorch
Tools & Technologies: Git/GitHub, Docker, Linux, VS Code, Vim, Cloudflare Tunnels, Google Calendar API, Telegram Bot API

PROJECTS

Event Watcher | *Python, BeautifulSoup, Google Calendar API, Telegram Bot API* Jan 2026 - Present

- Automated event tracking by surfacing **40+ job fairs and hackathons** from **12 sources** over **16 weeks**, scraping webpages with **BeautifulSoup**, matching **25+ keywords**, and parsing dates with **dateparser**
- Prevented **15+ scheduling conflicts** by checking events against **Google Calendar** before insertion, sending **Telegram** alerts within **3 minutes** of detection, and using **SQLite** to prevent duplicate entries

AI Content Detection Tool | *FastAPI, React, BeautifulSoup* Feb 2026 | 24-Hour Hackathon

- Delivered a **full-stack content detection prototype within 24 hours** in a **4-person team** by implementing **4 detection features** and **8+ React components** for content classification
- Automated **web content classification** by scraping with **BeautifulSoup**, scoring **30+ weighted keywords across 5 categories**, and serving results through **4 FastAPI endpoints**

HomeLab | *Docker Desktop, Cloudflare Tunnels* 2024 - Present

- Maintained **98% uptime** for **10+ users** across **2 self-hosted applications** since 2024 by deploying **Jellyfin**, **Immich**, and **3+ AI models** including **image generation** with **Docker**
- Secured remote access with **zero exposed inbound ports** by configuring encrypted **Cloudflare Tunnels**, eliminating conventional **router port forwarding**

EXPERIENCE & LEADERSHIP

Queen's University Sep 2026 - Present
Head Teaching Assistant, Introduction to Python *Kingston, ON*

- Improved Python instruction for **118 students** by delivering **10+ tutorials** and translating **10+ programming concepts** into live coding demonstrations and practical examples, increasing student engagement by **35%**
- Streamlined academic support for **118 students** by coordinating **5 teaching assistants** across **4 instructional areas**, processing **200+ submissions** and reducing grading turnaround time by **30%**

Queen's University Feb 2026 - Mar 2026
Research Assistant, PhD Project (Volunteer) *Kingston, ON*

- Strengthened an ongoing literature review by analyzing **30+ academic studies** over **2 months**, synthesizing **5+ AI mental-health chatbot approaches** across **3 research dimensions**—methods, findings, and evaluation metrics
- Standardized comparison across **30+ studies** by documenting **10+ evaluation criteria**, including **research methods, limitations, datasets, performance metrics, and major findings**, enabling structured cross-study analysis

Queen's Computing Students' Association (COMPSA) 2025 - Present
Industry Outreach & Social Events Coordinator *Kingston, ON*

- Maintained secure infrastructure for **5-6 daily active users** by combining **Cloudflare Tunnels**, restricted access, automated backups, and **Discord alerts**, detecting **100% of 10-15 outages within 5 minutes**
- Expanded industry networking opportunities for **40+ students** by connecting them with **3 alumni professionals** through a structured networking event, coordinating **10+ outreach communications** and maintaining records for future engagement

Michelin Summer 2026
Summer Student, Machine Operator *Bridgewater, NS*

- Prevented **$5,000+ in production defects** across **5 product specifications** by applying **data validation** and **anomaly detection** to **100+ precision measurements**, flagging **5-10 dimensional defects per shift**
